## CYBER SECURITY BASICS: PASSWORDS

Using strong passwords to protect access to all your electronic devices is the building block of basic cyber security. Each device should have its own password, that you regularly update. Avoid using sequences of numbers, keyboard or alphabet. Click to read more on the [CyberPoster](#) and about establishing [Strong Passwords](#).

You may also click for information on [Best Password Managers of 2017](#). This information is provided for loss prevention purposes and does not constitute an endorsement of any product or service by OBLIC.

If you have additional questions on this or any other loss prevention topic, please contact:
